

SW Series

Standard-Duty Sleeve-Web® Netting

SW Series standard-duty Sleeve-Web® netting [approximately .070" (1.78 mm) thick] provides low-cost protection against physical damage to exterior surfaces of machined, ground, polished, plated, coated or threaded cylindrical parts. Its elasticity ensures a snug fit and a nonslip grip on straight-sided parts or those with varying contours.

Material: Low-Density Polyethylene **Color:** See chart

SW Series

Light-Duty Sleeve-Web® Netting

SW Series light-duty Sleeve-Web® netting [approximately .060" (1.52 mm) thick] protects lighter parts. Ideal for irregular-shaped products, it stretches easily to twice its diameter, while its elastic properties allow it to pull tightly around smaller sections. Inexpensive, attractive, and easily applied wrapping for long, narrow items such as wires, glass rods, tubing and rolled paper.

Material: Low-Density Polyethylene **Color:** See chart

SW Series

Heavy-Duty Sleeve-Web® Netting

SW Series heavy-duty Sleeve-Web® netting [approximately .080" (2.03 mm) thick] has a thicker extrusion, more strands, and closer spacing. It offers an extra measure of protection for valuable precision components like heavy duty truck parts, screw cylinders, spline shafts, couplings, roller bearing assemblies, pistons, and heavy threaded fittings. Eliminates high cost, time-consuming labor associated with traditional protective wrappings like paper, cardboard, styrofoam or wood.

Material: Low-Density Polyethylene **Color:** See chart

packaging & netting
