Modular Wire Routing Clips:

- Plug and Play various wire management designs.
- Mount with Straight and 90° orientation to the mounting surface for flexibility from project to project.
- Nylon 6/6 wire management devices insulate cables from PV and Racking surfaces.
- Modular wire management devices are removable.
- Nylon material is heat stabilized and UV rated for the harsh outdoor applications in the solar market.

Stainless Steel Mounting Clips:

- Stainless Steel PV edge clips mount onto a minimum flange depth requirement of only 10 mm and holds as tight as our popular SunRunner Series.
- Locking tabs securely fasten clips to module extrusions or other panels.
- Generous lead-in for installation without tools.
- Neatly dresses cables on PV panel frames or top rail solar racking systems up to 1/4" width.
- Constructed from corrosion resistant 304 stainless steel; not for use in marine salt water environments.
